Data Centre & Server Room

ISO 14644-3: Test Methods

This part specifies test methods for designated classification of airborne particulate cleanliness and for characterizing the performance of cleanrooms and clean zones. These test methods are specified in the document for two different types of cleanrooms and clean zones; unidirectional flow and no unidirectional flow. The most important objectives of this highly referenced document are to provide an internationally common basis of measurement and evaluation of cleanrooms and, at the same time, not to prevent the introduction of new technologies.

Technical Cleaning Services

- ✓ Data Centre Cleaning
- ✓ Server Room Cleaning
- ✓ Computer Room Cleaning
- ✓ Comms Room Cleaning
