Data Centre & Server Room

ISO 14644-7: Reparative devices

This part of ISO 14644 specifies the minimum requirements for the design, construction, installation, testing and approval of reparative devices in those respects where they differ from cleanrooms as described in Parts 4 and 5. Reparative devices range from open to closed systems.

The limitations are:

- Application-specific requirements are not addressed.
- User requirements are as agreed by customer and supplier.
- Specific processes to be accommodated in the reparative device installation are not specified.
- Fire, safety and other regulatory matters are not considered specifically; the appropriate national and local requirements shall be respected.
- Full-suits are not within the scope of this standard.

This part was published as an International Standard in 2004. The document was submitted as an American National Standard and has been adopted as ANSI/IEC/ISO 14644-7:2004.

Technical Cleaning Services

- ✓ Data Centre Cleaning
- ✓ Server Room Cleaning
- ✓ Computer Room Cleaning
- ✓ Comms Room Cleaning
